PRODUCT CARE

Natural variations occurring in wood or other materials are not considered defects and the colour-fastness or matching of colors, grains, or textures of such materials may be different from a product to the other. Furniture made of solid wood is sensitive to the environment. Variations in humidity and temperature may cause the wood to swell or shrink, resulting in the occurrence of unevenness and small cracks. Knots and resin are completely natural. Regardless of whether the wooden furniture is waxed, painted or sprayed it can become scratched and dented if treated carelessly. Caution must be taken when using grime, grease and liquids.

Please follow the below care instructions to enjoy your furniture to the fullest:

- Do not place the furniture outdoors;
- Do not place furniture next to radiators, heating and cooling vents. Keep the wooden furniture at an even temperature with stable humidity. Recommended climate temperature: 18-22°C, humidity between 40 and 60%.
- Cyclic changes in temperature in an unheated environment (cool at night, warmer during the day) can cause small cracks of the wood;
- Direct sunlight should be avoided; it can dry out wood furniture and has a bleaching effect on wood and finishes;
- Do not put hot, scratchy or wet objects on finished surface; use tablecloth/ place mats;
- Avoid mechanical shocks by handling carefully. Never drag the pieces across the floor, as this will cause damage to the joints;
- For water based finishes use special wax oil recommended by your furniture retailer to maintain the surface's natural sheen and resistance against the liquids, stain and scratches. Apply the same wax on drawers or door's sliding shafts to ensure smooth gliding.
- Clean sprayed surfaces with a damp cloth using only water or mild soap and water solution and finish by wiping off with dry cloth.
- Do not use strong cleaning agents containing ammonia, alcohol or silicone.

THE PRODUCTS

Our standard models of furniture are made of solid pine and spruce wood, as well as MDF, on limited areas, for stability or constructional purposes (like door panels or sides of the flexi products). It may also be the preferred material for specific projects like bathroom items or shop display units.

All our chairs are made of solid beech wood. On special request, pine wood may be considered for exclusive models. Table tops are made of pine and spruce solid wood, beech or oak, as per customer's request.

The photographs in the catalogue and on the website do not always faithfully reproduce paint and stain colours.

The dimensions in our catalogue and on the website are taken from the widest outside points. They have been provided by the Seller in the belief that they are as accurate as reasonably possible, but they do not constitute a description of the goods and are not warranted to be accurate. When exact dimensions are needed, please advise us when placing the order.

The Seller reserves the right to make any change in design without prior notice.
